Re: Reynolds Pit, Permit No. M-2006-028, Technical Revision Approval, Revision No. TR-1

Dear Mr. Reynolds:

On December 4, 2012 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on November 8, 2012, addressing the following:

Revised the mining and reclamation plan to allow for mining of the 20 acre southern parcel.

The terms of the Technical Revision No. 1 approved by the Division are hereby incorporated into Permit No. M-2006-028. All other conditions and requirements of Permit No. M-2006-028 remain in full force and effect.

The currently held liability amount of \$74,440.52 is adequate at this time. Currently 17 acres have been disturbed and the current reclamation bond calculation accounts for 18 acres of disturbance. Also, the operation is only allowed to have a maximum of 20 acres of disturbance at one time. The division must be notified once the disturbance is greater than 18 acres so a revised reclamation cost estimate can be completed.

If you have any questions, please contact me (970) 241-2042.

Sincerely,

Travis H. Marshall
Environmental Protection Specialist
