Denver, Colorado 80202

Re: Response to Inspection Report, Challenger Pit (M-1985-026).

Mr. Hays,

After having reviewed your Inspection topics and corrective actions we would like to request an extension of 30 days (January 1, 2013) to complete the corrective actions and finalize approval of the well permit / substitute water supply plan. Please note that a temporary substitute water supply plan is pending final approval following a company wide audit by the SEO on Coulson's replacement water source.

Sincerely,

A handwritten signature in black ink that reads 'Peter Wayland'.

Peter Wayland  
President
