RE: May Day Idaho Mine Complex, Permit No. M-1981-185, Technical Revision (TR4), Adequacy Review (1)

Dear Mr. Oser:

On February 6, 2013 the Division of Reclamation, Mining and Safety (Division) received Wildcat Mining Corporations's (WMC) request for a Technical Revision (TR4) to Permit No. M-1981-185. TR4 addresses plans to restore and stabilize Little Deadwood Gulch in the May Day 2 area. During review of the material submitted, the Division determined that the following issues of concern shall be adequately addressed before TR4 can be considered for approval.

1. Please inform the Division of the seed mix and seeding rate to be used for revegetating the disturbed areas.
2. Please inform the Division of any other required permits, licenses or approvals WMC holds or will be seeking in order to conduct the proposed activities.

If you require additional information, have questions or concerns, please contact me at the DRMS Grand Junction Field Office.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dustin Czaplak", written over a horizontal line.
