RE: Extension Request - Regular 112
Operation Reclamation Permit,
Western Gravel E&P Waste Disposal Facility

Dear Mr. Marshall:

On behalf of Western Gravel, LLC (WG), NWCC, Inc. (NWCC) is requesting a 90-day extension to the decision regarding the amendment application associated with Permit No. M-20-08-070. Based upon NWCC's understanding, outstanding issues remain regarding *112 Construction Materials Reclamation Permit Amendment Application, WRC Gravel Pit, Permit No. M-2008-070* and must be addressed before the application can be considered technically adequate and approved. This correspondence follows my February 28, 2013 e-mail extension request and is intended to provide time to respond to these issues.

If you have questions or any concerns, please do not hesitate to contact me. We look forward to continue to work with you.

Sincerely,
NWCC, Inc.

Gary R. Webber, P.G.
Senior Environmental Consultant
