RE: SR-13A Mine, File No. M-1977-311, Amendment (AM1), Radiometric Survey

Dear Mr. Williams:

On December 7, 2012 the Division of Reclamation, Mining and Safety (Division) received your *Response to Adequacy Review #1* which included a radiometric survey map of the site. The following issues regarding the map shall be adequately addressed before the application can be considered for approval.

1. Please revise the map to show the permit boundary.
2. Please provide a map at a scale of one hundred feet to the inch. Multiple maps may be submitted, if necessary, to show the entire affected area.
3. The areas of higher radioactivity are labeled ">100". Please define the upper end of this gradation.

Please submit your response by March 22, 2013. The Division will continue to review your application and will contact you if additional information is needed.

If you require additional information or have questions or concerns, please contact me at the DRMS Grand Junction Field Office.

Sincerely,

A handwritten signature in black ink, appearing to read "Dustin Czaplá", written over a horizontal line.

Dustin Czaplá
