RE: May Day Idaho Mine Complex, Permit No. M-1981-185, Technical Revision (TR-5) Approval

Dear Mr. Oser:

On April 1, 2013 the Division of Reclamation, Mining and Safety (Division) approved the Technical Revision request (TR-5), which was submitted to the Division on March 19, 2013, addressing the following:

The removal of mine debris from Little Deadwood Gulch in the Chief Portal area, installation of a culvert within the LDG channel, stabilization of the highwall and access road above the Chief Portal, and repair of the emergency manway exit.

The terms of TR-5 approved by the Division are hereby incorporated into Permit No. M-1981-185. All other conditions and requirements of the permit remain in full force and effect.

Please note that the new access road from CR124 may not be utilized for vehicular access to the site to conduct the activities proposed through TR-5 until the road improvements, proposed and approved through TR-2, have been completed and approved by the Division.

If you require additional information, or have questions or concerns, please contact me at the DRMS Grand Junction Field Office.

Sincerely,

Dustin Crapla
