Tim,

I am just following up to our telephone conversation earlier today on the temporary portable storage units and offices that are being brought to Cresson Project for the PSE Construction Project.

There will be a total of 6 temporary and mobile units that will be brought to site and then removed by July 1, 2014 once construction of the PSE facilities are completed.

There will be a materials/supply connex near the temporary warehouse above the PSSA pumps in Phase II of the VLF and a tool storage connex on the eastern portion of the PSE platform. There will be 4 office mobile office trailers, the largest being 14' wide by 66' long that will be located on the access road just south of the Phase 1 PSSA Pumps on the access road to the temporary warehouse above the PSSA pumps in Phase II of the VLF.

All mobile units will be removed from the site once construction of the PSE facilities are completed and there will be no permanent foundations associated with the 6 mobile units.

Thanks,

Timm
