OBSERVATIONS

This inspection was conducted as part of the Division of Reclamation, Mining and Safety monitoring program. The condition of this site is very similar to that at the time of the inspection conducted in 2008.

A sign is posted at the entrance to the site and the boundaries are easily identifiable in the field. The disturbance at this site consists of an excavation into a hillside adjacent to the county road. Topsoil has been stockpiled and preserved with vegetation. The excavation is oriented well away from the boundaries at the site.

The operation is being conducted within the parameters of the approved permit.
