**Re: Permit M 2013-026 , Extension for Review, 110(2) Permit**

Dear Mr. Czapla,

Lockland,LLC is requesting an extension of the review period to July 15, 2013, for Permit M 2013-026. One of the property owners of surface and sub-surface right has requested more information and assessments to be completed prior to the application review. The party requesting this information and study is BLM. they have asked for time to prepare assessments under NEPA. I am not completely sure of all the requirements that have to be met, except that some processes have been completed already. I am in touch via e-mail with BLM, and have asked for a time line ,but they cannot say definitively, so Lockland, LLC is asking for 30 day extension at first.

I will keep you informed on any updates I may receive if you wish.

Thank you for your patience and your help on this process, and feel free to contact me at any time if any additional information is needed. [leadlocks@netzero.net](mailto:leadlocks@netzero.net) or phone.

Sincerely,

Robert W. Calder
