## **OBSERVATIONS**

### **Reclamation Success:**

This inspection was conducted as part of the normal monitoring program established by the Colorado Division of Reclamation, Mining and Safety for monitoring of Notices of Intent (NOI). PowerTech is requesting the release of one of three prospecting notices: P-2010-011, SL-01. Jim Bonner, representative for Powertech accompanied Division inspector Russ Means on site.

The NOI project activities for this site involved the traversing of lands either owned or under control of Powertech with ATVs to gather surface baseline data. No roads, excavations, or drilling were proposed or conducted on the lands. This inspection was to verify no disturbances to the lands prior to release of the \$100.00 cash bond held.

Attached pictures to this report are typical of the entire area surveyed and indicate no disturbances that require reclamation or additional attention under this NOI. Therefore, the NOI is eligible for full release.
