Inspection Topic Summary

NOTE: Y=Inspected N=Not Inspected R=Comments Noted V=Violation Issued NA=Not Applicable

Y - Air Resource Protection Y - Roads

R - Availability of Records NA - Reclamation Success

Y - Backfill & Grading **R** - Revegetation

NA - Subsidence **NA** - Excess Spoil and Dev. Waste

NA - Explosives **Y** - Slides and Other Damage Y - Support Facilities On-site Y - Fish & Wildlife **R** - Signs and Markers R - Hydrologic Balance

NA - Support Facilities Not On-site Y - Gen. Compliance With Mine Plan NA - Other NA - Special Categories Of Mining

NA - Processing Waste **R** - Topsoil

COMMENTS

This was a complete inspection of the Hayden Gulch Loadout; DRMS permit no. C-1992-081. The site is operated by Hayden Gulch Terminal, LLC. I, Jared Ebert of the Colorado Division of Reclamation, Mining and Safety (Division) conducted the inspection. Mr. Roy Karo with Hayden Gulch Terminal (HGT) was aware of the inspection but did not accompany me into the field. The records check was conducted at the Sage Creek Mine office on Monday August 12, 2013 and the site was inspected on Friday August 16, 2013. The weather was clear and warm during the field inspection.

AVAILABILITY OF RECORDS – Rule 5.02.4(1):

The Division conducted a records check of the files at the Sage Creek Mine Office on Monday August 12, 2013. The Division completed the records check for the hydrology records that same day at the site in the office trailer. See the last page of this report for details.

HYDROLOGIC BALANCE - Rule 4.05; Drainage Control 4.05.1, 4.05.2, 4.05.3; Siltation Structures 4.05.5, 4.05.6; Discharge Structures 4.05.7, 4.05.10; Diversions 4.05.4; Effluent Limits 4.05.2; Ground Water Monitoring 4.05.13; Surface Water Monitoring 4.05.13; Drainage – Acid and Toxic Materials 4.05.8; Impoundments 4.05.6, 4.05.9; Stream Buffer Zones 4.05.18:

Culverts RRC-1 through RRC 17, 20 and 21 were observed. RRC-1 appears to be obstructed with rocks and will need to be cleared.

The truck loop pond was holding water but was not discharging. The primary and emergency spillways were clear and functional. The pond embankment was stable and vegetated. A large patch of Canada Thistle was observed on the shore of the pond and will need to be treated.

The rail loop pond was dry and not discharging. The primary and emergency spillway was stable and functional. The earth berm at the discharge pipe in the spillway needs to be repaired. The pond embankment was stable and vegetated.

Number of Partial Inspection this Fiscal Year: 1 Number of Complete Inspections this Fiscal Year: 1 Ditches 1, 2, 3, 7 and 8 were observed. This ditches appeared clear and functional.

REVEGETATION – Rule 4.15, Vegetative Cover; Timing:

The former facilities area and topsoil stockpile 2 area was observed. The primary vegetation that has established at the site is Yellow Sweet Clover and Kochia. Some perennial grasses were observed. Both areas appeared stable.

A large patch of Canada Thistle was observed near where an access corridor was constructed to access topsoil from Topsoil Stockpile 2.

SIGNS AND MARKERS – Rule 4.02:

Mine identification signs were observed at the following locations; where highway 40 intersects the permit boundary, at each spot County Road 37 crosses the permit boundary, the entrance from County Road 53, the various roads that cross the Tie-Across Haul Road and at the entrance from Twenty Mile Road.

The permit boundary markers were observed throughout the site and appear to be in the correct location.

TOPSOIL – Rule 4.06; Removal 4.06.2; Substitute Materials 4.06.4(4); Storage and Protection 4.06.3; Redistribution 4.06.4:

Topsoil stockpiles 2 and 3 were observed. These piles were vegetated and stable.

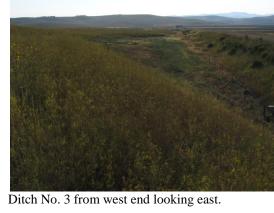

Along the Tie-Across haul road, topsoil piles A, C, D, E, F and G were observed. These piles appear stable and vegetated.
