In Violation CV-2013-005, the deadline for abatement of the practice, condition or violation described was fixed as described below. It is hereby found that the operator has failed to abate such practice, condition or violation, or cannot complete abatement within the time allowed, but that such failure is not due to lack of diligence on the part of the operator. The time for abatement is therefore extended as follows:

Abatement Step	Description	Original Date Due	Extended Due Date
1	Submit a complete Technical Revision to the permit that accurately represents the as-built configuration of the Carbon Junction Permanent Diversion, with supporting design details per Rule 4.05.3. This revision shall also include an updated, accurate post-mining topography map for the entire permit area and a map delineating the Carbon Junction drainage area.	7/1/2013, 8/9/2013, 8/26/2013	9/12/2013
2	Submit a complete Technical Revision to the permit that presents designs and plans for reestablishment of the Upper Carbon Junction Channel, including the un-named tributary that enters the drainage from the east, and reclamation and stabilization of the Carbon Junction Temporary Diversion and gully erosion. [The Upper Carbon Junction channel segment runs from the undisturbed channel upstream of the North Pit down to the beginning of the rip-rapped Carbon Junction Permanent Diversion, a distance of approximately 1900 feet.]	7/1/2013, 8/9/2013, 8/26/2013	9/12/2013
3	Repair and stabilize the gully erosion that has formed in the Carbon Junction Temporary Diversion, according to the approved plan required by Abatement Step #2.	8/21/2013, 8/26/2013	11/22/2013
4	Reestablish the Upper Carbon Junction Channel, including the un-named tributary that enters the drainage from the east, according to the approved plan required by Abatement Step #2.	8/21/2013, 8/26/2013	11/22/2013
