8. *Remarks:*

a. The City hereby reserves the right, and gives notice to all interested parties, that it will further refine the time periods and flow rates claimed herein and provide such information to the Colorado Water Conservation Board (“CWCB”) and objectors in this proceeding. While flow rates will not exceed the above-listed claims, nor extend beyond the time periods listed, it is the City’s intent that any final decree in this matter will limit the total volume of water represented by the flow rates decreed for the claimed recreational in-channel diversions to no greater than 50% of the sum of the total average historical volume of water for the stream segments where the diversion structures will be located, pursuant to C.R.S. § 37-92-305(13)(f). Based upon preliminary engineering, this is expected to result in no more than 46 days each year with flow rates in excess of 1250 c.f.s. With regard to the 4000 c.f.s. claimed flow rate, it is the City’s intent to confirm an event flow right at this rate for no more than five days each year to coincide with a holiday weekend or other planned special events.

- b. This Application is made pursuant to Colo. Const. Art XVI, § 5, Art XVI, § 6, and C.R.S. §§ 37-92-101, *et seq.* Pursuant to C.R.S. § 37-92-102(5), within 30 days of filing the Applicant will submit a copy of this Application to the CWCB for review.

RESPECTFULLY SUBMITTED this 31st day of December 2013.

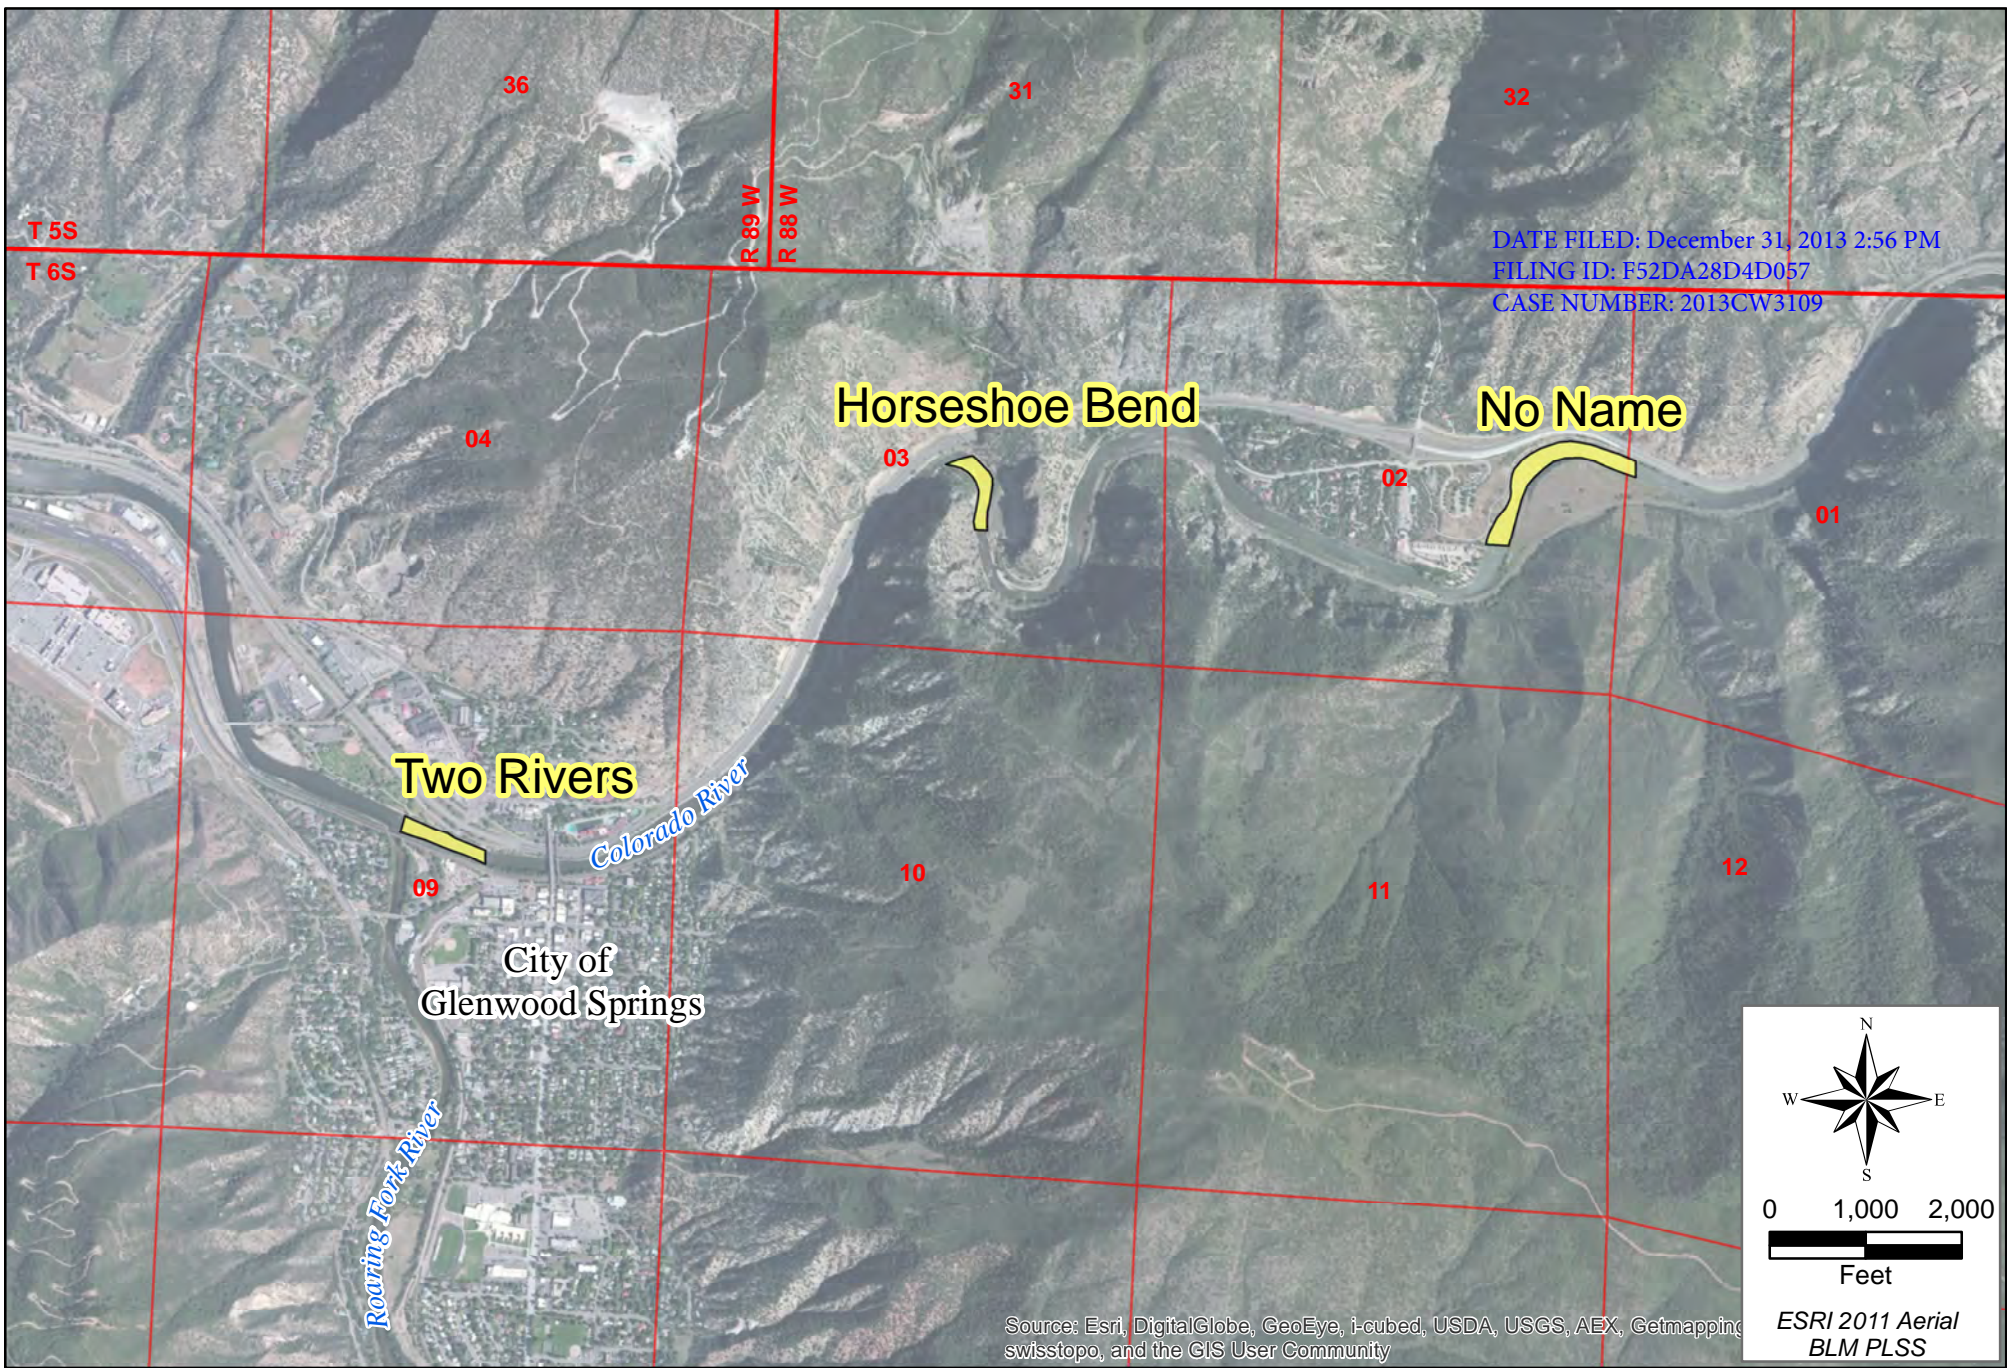

Respectfully submitted,
