# TABLE OF CONTENTS

1.0 INTRODUCTION TO THE MUNICIPAL WATER EFFICIENCY GUIDANCE DOCUMENT .............................................................................................. 1

1.1 SCOPE OF DOCUMENT ............................................................................................................ 1

1.2 TERMINOLOGY ................................................................................................................................ 2

1.3 DOCUMENT ORGANIZATION ..................................................................................................... 4

2.0 OVERVIEW OF WATER EFFICIENCY PLANNING .................................................................... 5

2.1 WHAT IS WATER EFFICIENCY? .................................................................................................. 5

2.2 WHAT IS EFFECTIVE WATER EFFICIENCY PLANNING? ......................................................... 5

2.3 WATER EFFICIENCY PLANNING AND WATER SUPPLY AND DROUGHT PLANNING .......... 5

2.3.1 Water Efficiency and Drought Management Planning .................................................. 6

2.3.2 Water Efficiency and Demand Hardening ...................................................................... 7

3.0 ROLE OF THE STATE IN WATER EFFICIENCY PLANNING ............................................ 9

3.1 STATE LEGISLATION ................................................................................................................. 9

3.2 ROLE OF CWCB AND WATER EFFICIENCY PLANNING ..................................................... 9

4.0 STEPS TO WATER EFFICIENCY PLANNING ........................................................................ 11

4.1 STEP 1 – PROFILE OF EXISTING WATER SUPPLY SYSTEM ................................................ 13

4.1.1 Overview of Existing Water Supply System ........................................................................... 13

4.1.2 Water Supply Reliability ........................................................................................................ 14

4.1.3 Supply-Side Limitations and Future Needs ........................................................................ 15

4.2 STEP 2 – PROFILE OF WATER DEMANDS AND HISTORICAL DEMAND MANAGEMENT ....... 16

4.2.1 Demographics and Key Characteristics of the Service Area ............................................. 16

4.2.2 Historical Water Demands .................................................................................................... 17

4.2.3 Past and Current Demand Management Activities and Impact to Demands .................. 28

4.2.4 Demand Forecasts .................................................................................................................. 33

4.3 STEP 3 – INTEGRATED PLANNING AND WATER EFFICIENCY BENEFITS AND GOALS ...... 35

4.3.1 Water Efficiency and Water Supply Planning ..................................................................... 35

4.3.2 Water Efficiency Benefits .................................................................................................. 39

4.3.3 Water Efficiency Goals ....................................................................................................... 40

4.4 STEP 4 – SELECTION OF WATER EFFICIENCY ACTIVITIES .................................................. 42

4.4.1 Demand Management Activities .......................................................................................... 44

4.5 STEP 5 – IMPLEMENTATION AND MONITORING PLAN ....................................................... 56

4.5.1 Implementation Plan .............................................................................................................. 57

4.5.2 Monitoring Plan ................................................................................................................... 58
4.6  ADOPTION OF NEW POLICY, PUBLIC REVIEW AND FORMAL APPROVAL ...................... 60
  4.6.1 Adoption of New Policy ...................................................................................... 60
  4.6.2 Public Review Process ....................................................................................... 60
  4.6.3 Local Adoption and State Approval Processes .................................................. 60
  4.6.4 Periodic Review and Update .............................................................................. 61
  4.6.5 Local Water Efficiency Plans and Informational Resources .................................. 62

5.0  PUBLIC STAKEHOLDER INVOLVEMENT ............................................................. 63
  5.1  PLAN DEVELOPMENT WITH PUBLIC AND STAKEHOLDER PARTICIPATION .......... 63
  5.2  PUBLIC PARTICIPATION WITH IMPLEMENTATION AND MONITORING .................. 66

6.0  ORGANIZATION AND CONTENT – TEMPLATE FOR A WATER EFFICIENCY PLAN ....................................................................................................................... 68
  6.1  ORGANIZATIONAL TIPS FOR WATER EFFICIENCY PLANS ................................. 68
  6.2  HOW TO USE THE MODEL TEMPLATE .................................................................. 68
  6.3  WATER EFFICIENCY PLAN MODEL TEMPLATE ..................................................... 69

7.0  REFERENCES .......................................................................................................... 89

Appendix A  Guidance Document Worksheets ................................................................ A.1
Appendix B  State Policy ............................................................................................... B.1

LIST OF TABLES

Table 1  Water Efficiency Activities and Drought Strategies .............................................. 7
Table 2  Annual Treated Water Deliveries ......................................................................... 18
Table 3  Average Monthly Treated Water Deliveries (2002-2009) ..................................... 19
Table 4  Annual Water Deliveries for a Dual Water Supply System .................................. 20
Table 5  Annual Treated Water Metered Use by Customer Category ................................ 23
Table 6  System-Wide Per Capita Water Demands ........................................................... 24
Table 7  Residential Per Capita Water Demands ............................................................... 26
Table 8  Water Efficiency Goals ...................................................................................... 41
# TABLE OF FIGURES
