RE: Request for Administration of the Instream Flow Water Right on the Slate River between the confluence with Coal Creek and the confluence with the East River

DATE: August 3, 2020

On behalf of the Colorado Water Conservation Board, I am requesting administration of the Board's instream flow water rights on a segment of the Slate River, in Water District 59, to preserve the natural environment to a reasonable degree. Information about the specific ISF segment is shown in the table below.

Case No.	Upper Terminus	Lower Terminus	Amount	Appropriation Date	WDID
80CW0092	confluence Coal Creek	confluence East River	12 (12/1 - 3/31) 23 (4/1 - 11/30)	3/17/1980	5901506

The SLATE R AB BAXTER GL @HWY 135 NR CRESTED BUTTE, CO gage is located in the ISF reach and demonstrates that flow conditions are below the decreed ISF water right. The Board is requesting administration to ensure that water up to the full decreed amount of this water right is made available based on the priority system. The effective date of this call is August 3, 2020 and the call is to be in effect until the end of the current irrigation year.

Signed:

Robert Viehl
