**CAMP CREEK DESIGNATED GROUNDWATER BASIN
WATER LEVEL MEASUREMENTS
2025**

This report contains the basic groundwater level data collected from wells in the Camp Creek Designated Groundwater Basin during the period from 1993 through 2025, as well as the initial static water level contained in the well construction report. Acquisition and publication of this information is a cooperative effort between the well owners and the Colorado Division of Water Resources. The project is part of a statewide groundwater level monitoring program funded by Senate Bill 200 (1987 legislative session). This legislation directed that a portion of the fees collected for water well permit applications be used for the establishment of a program to monitor water-level trends throughout the state.

The report contains water level measurements for ten wells measured March 3, 2025. The wells are listed by name in numerical order and the locations of those wells in the geographic context of the designated basin are shown on the following map. All monitored Camp Creek wells are located in Townships 2 and 3 North, Range 54 West of the 6th P.M. Depth to groundwater, below land surface, ranged from approximately 11 to 39 feet. Two wells, CC-01 and CC-02, in the upper reaches of Camp Creek measured the shallowest water levels, less than 20 feet below ground surface.

Tabular and graphical data are presented for each well for the available period of record. Analyses of changes in the water level in the aquifer are complicated by unknown pumping schedules.

A small rise in groundwater levels in wells across the Camp Creek Designated Basin was observed. While seven of the ten wells measured had increasing water levels, the overall trend was relatively stable with only a 0.09 feet increase measured. The basin-wide declining trend has shown signs of leveling-off in the past 10 years, even showing a slight upturn in several wells. CC-10 has shown the largest decline during that period with water levels falling 2.94 feet. Water levels in CC-01, at the upper end of the basin, have continued to show an increasing trend since the early 2000's.

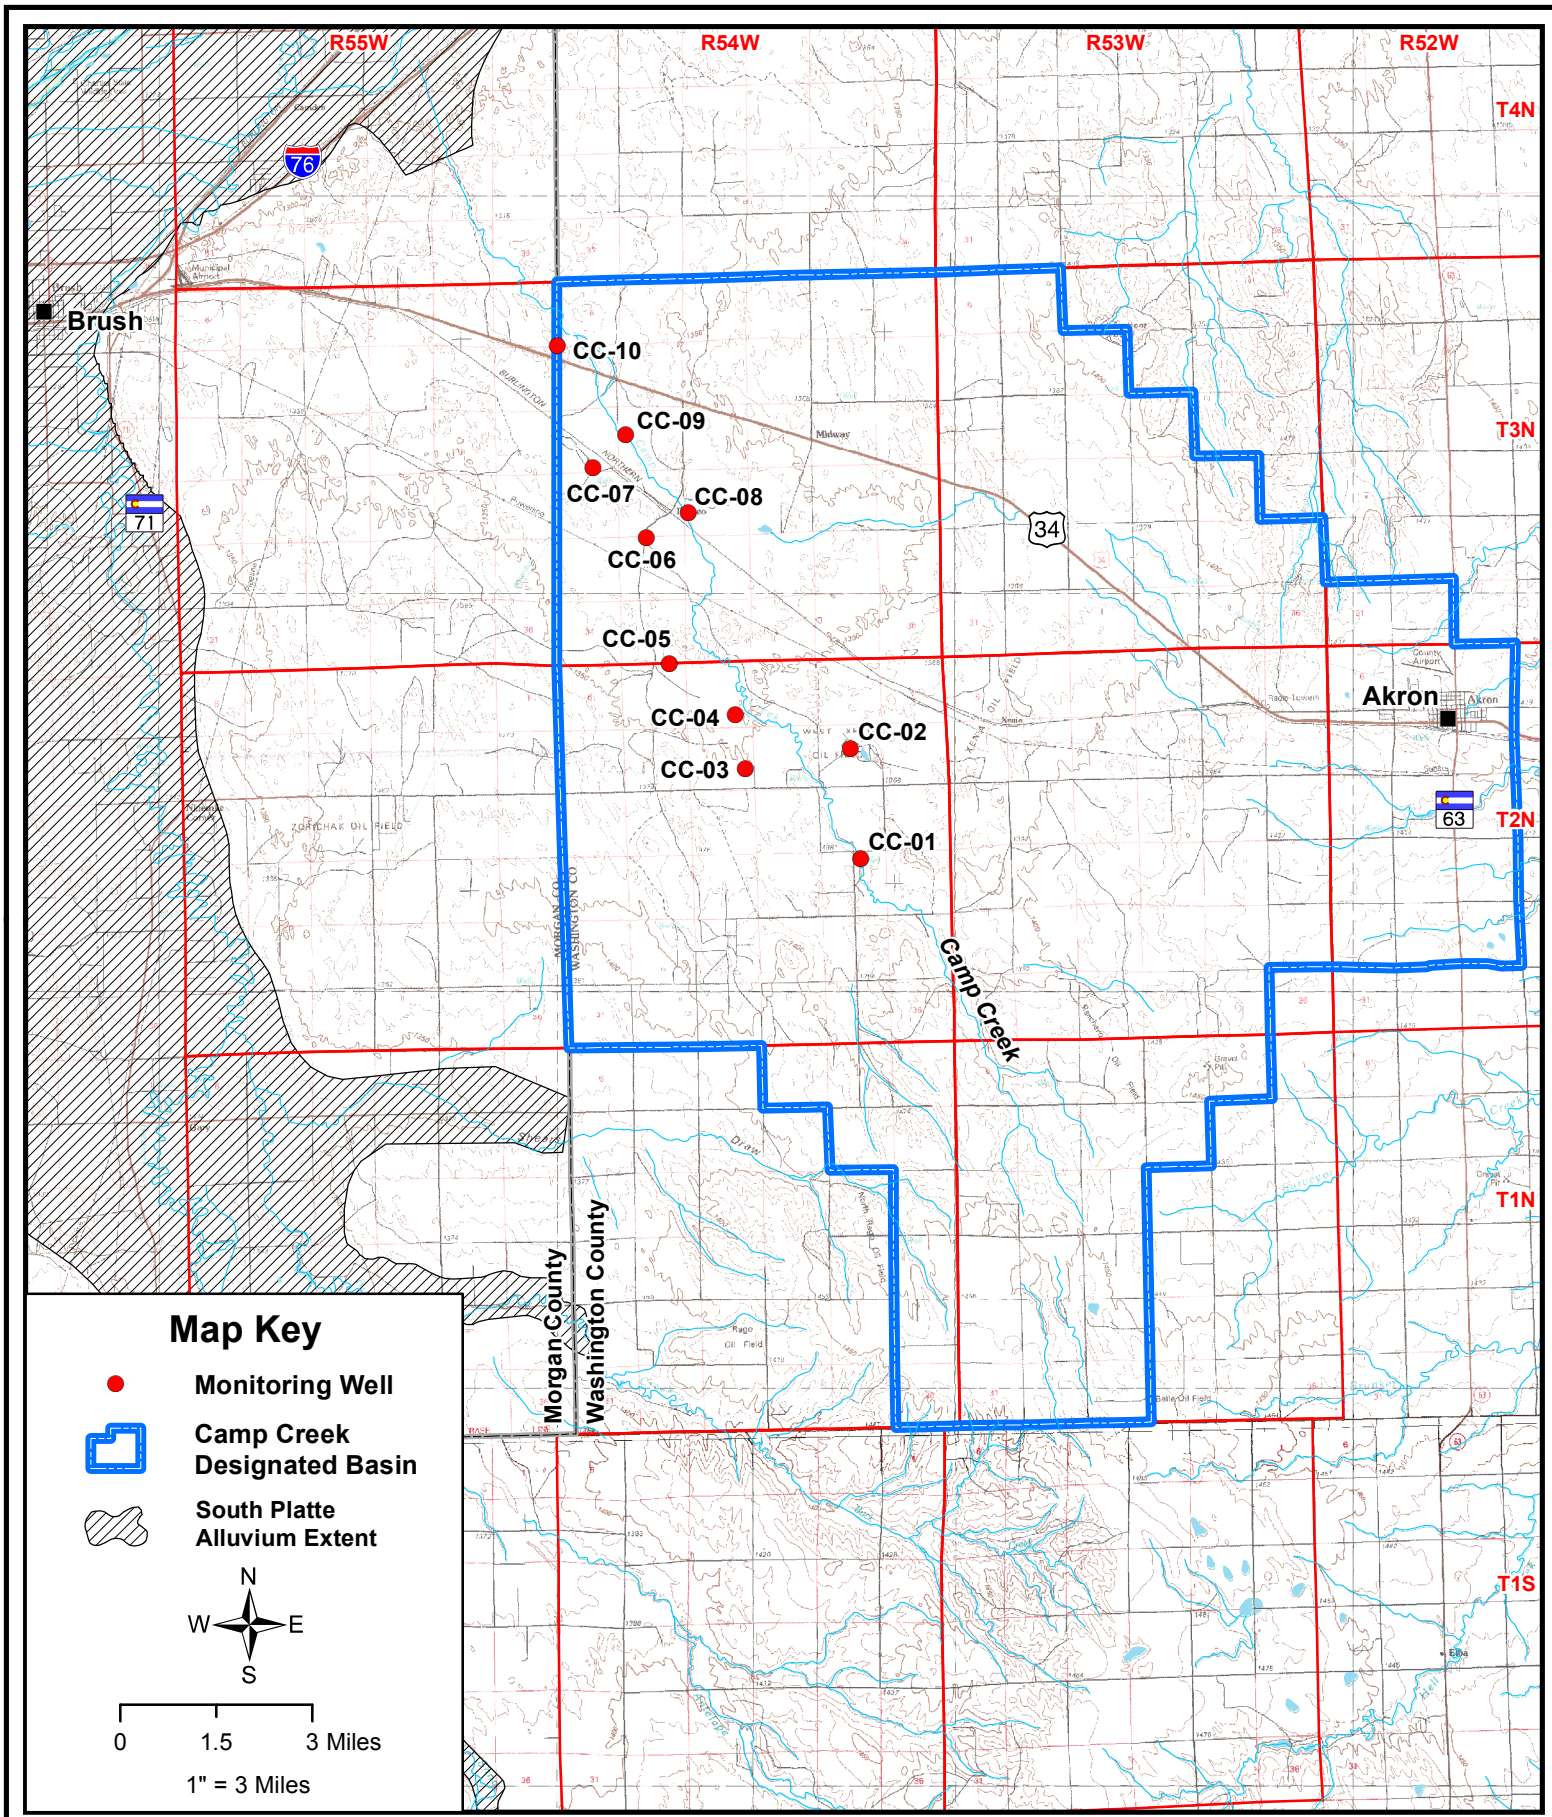

An electronic copy of this report is available on the Division of Water Resources website:
<https://dwr.colorado.gov/services/well-construction-inspection#groundwater-levels>

The direct link to the Camp Creek Publication Area on the CDSS webpage:
<https://dwr.state.co.us/Tools/GroundWater/WaterLevels?submitButton=Submit&SelectedGeoValue=waterDivisionDiv&SelectedPublicationAreaName=CAMP%20CREEK&SelectedAquiferName=All>

Additionally, all groundwater level data may be accessed and exported using the tools available on the Colorado Decision Support System website:
<https://dwr.state.co.us/Tools/GroundWater/WaterLevels>

or the Colorado Decision Support System MapViewer:
