LOST CREEK DESIGNATED GROUND WATER BASIN 2011

This report represents the results of water level measurements of wells in the Lost Creek Designated Ground Water Basin during the month of February 2011. The project was done in cooperation with the Lost Creek Ground Water Management District and local well owners. Funding for this project was supplied in part from well permit fees collected and managed by the Office of the State Engineer as a result of the passage of Senate Bill 200 during the 1987 legislative session.

Seventeen monitoring wells in the basin were measured on February 22, 2011. These wells are all part of an observation network in which some well measurements date back to the 1930's. However, observations for many of the wells didn't start until the 1950's and 1960's.

On average, ground water levels in wells measured by the Division of Water Resources were up 0.50 feet compared to 2010. Ground water levels in wells declined by 1.32 feet over the last five-year period and have declined by 4.33 feet over the last ten-year period. Generally, north of Interstate 76, the water levels are within approximately 20 feet of the surface and with ground water in a few wells within five feet of the surface. Between Highway 52 and Interstate 76, water levels are between 25 feet and 45 feet of the surface. Water levels south of Highway 52 range from 45 feet to over 110 feet below the ground surface.

A map is attached which shows the locations of the monitoring wells in the Lost Creek Basin.

Tabular data in this report are presented for each well for the previous 10 years. Graphical data are presented for the entire period of record. Information concerning bedrock wells for the Denver Basin Aquifers will generally be available in June of each year and can be obtained from the Office of the State Engineer. Complete tabular data for the Lost Creek Designated Ground Water Basin are available by calling the Office of the State Engineer.

Copies of the report can be purchased from the Office of the State Engineer, Records Section, 1313 Sherman St., Room 821, Denver, CO 80203, (303) 866-3447. Additionally, this data may be accessed on the internet at the Colorado Decision Support System website <http://cdss.state.co.us> and can be exported to a number of different formats.

LOST CREEK DESIGNATED GROUND WATER BASIN 2011

This report represents the results of water level measurements of wells in the Lost Creek Designated Ground Water Basin during the month of February 2011. The project was done in cooperation with the Lost Creek Ground Water Management District and local well owners. Funding for this project was supplied in part from well permit fees collected and managed by the Office of the State Engineer as a result of the passage of Senate Bill 200 during the 1987 legislative session.

Seventeen monitoring wells in the basin were measured on February 22, 2011. These wells are all part of an observation network in which some well measurements date back to the 1930's. However, observations for many of the wells didn't start until the 1950's and 1960's.

On average, ground water levels in wells measured by the Division of Water Resources were up 0.50 feet compared to 2010. Ground water levels in wells declined by 1.32 feet over the last five-year period and have declined by 4.33 feet over the last ten-year period.
