Chief, Hydrogeology Section

WESTERN COLORADO 2018

This report updates basic data concerning the depth to and elevation of groundwater in three distinct regions of western Colorado. Most of the wells for which data are reported were originally constructed or identified in the 1970's by the United States Geological Survey (USGS) as a part of their statewide monitoring well network. The USGS monitoring effort was abandoned in 1982, and in 1991 the State of Colorado Division of Water Resources initiated a program to monitor water levels in about 50 wells of that former monitoring network. The number of monitored wells is sparse in some areas.

The wells listed in this report are part of a statewide water-level monitoring network funded by Senate Bill 200 (1987 Legislative Session). That legislation directed that a portion of the fees collected for applications for water well permits be used for the establishment of a program to monitor groundwater levels throughout the state.

Geographic areas covered in this report include:

- San Juan basin - three wells
 - Fruitland and San Jose Formations
- The Colorado Plateau and Grand Mesa - nine wells
 - Mesa Verde Group, Dakota/Burro Canyon Formations
- The Piceance basin - forty-one wells
 - Green River, Parachute Creek, Uinta, and Wasatch Formations

The monitored wells are not evenly distributed in western Colorado, but are focused in specific basins or areas of interest. The well data are ordered alphabetically by well name. Maps for each of the three areas, displaying monitoring well locations and names, precede the data for individual wells. The specific aquifer being monitored in a well is listed on the data sheet for that well.

All available water-level data for each well is plotted as a true time series. As in previous reports, the accompanying data table only lists data from the last 10 years. The report also contains data from wells, which are part of this monitoring effort, but for which measurements were not available in 2018. Wells lacking measurements in the past 10 years have been removed from the monitoring program and are no longer included in this publication.

Paper copies of this report can be purchased from the Office of the State Engineer, Records Section, 1313 Sherman St., Room 821, Denver, CO 80203, (303) 866-3581. An electronic copy of this report, in Adobe PDF format, is available on the Division of Water Resources website <http://water.state.co.us/groundwater/Levels/Pages/HydroGeo.aspx>.

Additionally, all groundwater level data may be accessed and exported using the tools available on the Colorado Decision Support System:
<http://dnrweb.state.co.us/cdss/GroundWater/WaterLevels>

and the Colorado Information Marketplace HydroBase Bulk Data Exporter:
<https://data.colorado.gov/Information-Sharing/DWR-Well-Water-Level/hfwh-wsgi>

or the Colorado Decision Support System MapViewer
<http://water.state.co.us/DataMaps/GISandMaps/MapViewer/Pages/FAQ.aspx>

If you have any questions regarding Western Colorado groundwater and the information in this report, please contact the Groundwater Information Desk at (303) 866-3587.
